Re: Demand for records of Florida Repeater Council under FS617

Mr. Hudson,

Your client, Mr. Fields has demanded this information but has not provided any reasonable or proper purpose as required in the statute you referenced, for his request and/or usage of the corporation's proprietary information.

Much of what Mr. Fields has demanded is regularly published on the Corporation's web page and publicly available to anyone who is interested.

These demands appear to be an effort to harass the Directors of the Florida Repeater Council, Inc. because of an application that Mr. Fields has pending before the Florida Repeater Council, Inc. for a frequency coordination. That application has been delayed due to Mr. Fields refusal to provide detailed location information for his radio site as required of other applicants for such coordination. This coordination service is provided at no charge to the applicants under CFR part 97, and the Florida Repeater Council, Inc. is the Federal Communications Commission recognized coordinating body for the State of Florida.

The Florida Repeater Council, Inc. volunteer web developer reports that the development site was recently the object of an illegal intrusion where some data was stolen and has been published on a hacker related site. The identifying information of the sites involved in this data theft have been recovered and are being provided to law enforcement as part of a criminal complaint.

Should Mr. Fields desire to provide a reasonable and proper purpose for the information he demands we will consider such request at our Directors meeting in October. Lacking such a new request we will now consider this matter closed.

Mike Fletcher
Secretary
